

CSCI 201: Principles of Software Development

Term: Fall 2026

Units: 4

Lecture: Tue, Thu 11:00am-12:20pm, THH 101 (30389)

Labs: Monday 12:00-1:50pm, THH 112 (30107)
Tuesday 4:00-5:50pm, VHE 206 (30134)
Tuesday 6:00-7:50pm, DMC 157 (30241)
Wednesday 4:00-5:50pm, WPH 103 (30238)
Wednesday 6:00-7:50pm, DMC 158 (29904)

Quiz: TBD - ONLINE (29981)

Instructor: Marco Papa, Ph.D.

Office: Ginsburg Hall, 302E

Office Hours: Thursday 1:00-4:00pm

Contact Info: papa@usc.edu

Teaching Assistant: Yan, Yutian

Contact Info: yutianya@usc.edu

Teaching Assistant: Eibl, Philipp

Contact Info: eibl@usc.edu

Graders, Course Producers: Listed in Brightspace and Piazza

Catalog Description

Object-Oriented Programming in Java; using Java threads, Web Services and SQL to write client / server applications; team project; vibe coding with AI tools.

Course Description

Object-oriented paradigm for programming-in-the-large in Java; writing sophisticated concurrent applications with animation and graphical user interfaces; using professional tools on team project. Porting over all the C++ knowledge to Java. By the end of the semester, you should be more proficient in Java than C++, and will understand how to program large-scale applications, utilizing Web front-end and MySQL back-end.

Learning Objectives

Course Outcomes. By the end of this course, students will be able to:

i	Explain software engineering in terms of requirements, design, and implementation;
ii	Define requirements using interaction diagrams;
iii	Produce a software design based on requirements;
iv	Produce software, including graphical user interfaces, from a design;
v	Unit-test a module;
vi	Explain concurrency and how it works in computer operating systems;
vii	Write multi-threaded programs and correctly solve a mutual exclusion problem using semaphores or monitors;
viii	Write programs using Java;
ix	Design graphical user interfaces using HTML and CSS;
x	Use messaging as a communication method;
xii	Apply a software engineering process to a large software project;
xiii	Work effectively on a team;
xiv	Analyze ethical issues in working within a group.

Graduates of the program will have an ability to:

1	Analyze a complex computing problem and apply principles of computing and other relevant disciplines to identify solutions.
2	Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.
3	Communicate effectively in a variety of professional contexts.
4	Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
5	Function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline.
5	Use IDEs, AI Tools and LLMs to "vibe code" and produce applications.

Prerequisite(s): CSCI 104 or CSCI 114.

Course Notes

The course will have both lectures and labs. The lectures will be given live, in-person. Brightspace will be used for hosting the course materials (slides, labs, assignments). Brightspace will be used by students for uploading completed assignments and taking quizzes and exams.

In-person and Online Lectures

Lectures will be held live, in-person, and not on Zoom. Lecture recordings will not be available.

Technological Proficiency and Hardware/Software Required

We will be using Java, Eclipse, Tomcat, and MySQL in this class. Those pieces of software are available for free and will run on macOS, Windows and Linux laptops. The installations will be done as part of different labs throughout the semester. We will also be using HTML, CSS, and JavaScript. For “vibe coding” we will be using a variety of IDEs, AI assistants and LLMs. **Students are required to have a laptop**, running Windows, macOS or Linux, for labs and exams. USC Technology Support Link: [Zoom information for students](#). Link information for: the [USC Computing Center Laptop Loaner Program](#); for [software support and availability](#); for technology support for learning management platforms used in the course ([USC Brightspace Student Support](#)).

Readings and Supplementary Materials

The following textbook will be used for reference and is optional to purchase. Liang, Y. Daniel. [Introduction to Java Programming and Data Structures, Comprehensive Version, 12th Edition](#), Pearson, 2021. ISBN-13: 9780136520238.

Assessment and Assignments

The course includes 3 individual assignments and 1 team assignment. Assignment #1 covers basic Java topics, classes, file I/O and sorting. Assignment #2 covers locks, semaphores, concurrency, networking and multi-threaded programming. Assignment #3 covers a complete Web application built using HTML, CSS and JavaScript for the front-end, and Java Servlets, JDBC and MySQL for the back end. The final team project covers the entire software engineering process, including high-level requirements, technical specifications, design, architecture, implementation, testing, and formal documentation, plus a live demo of a running application. Each assignment serves to measure student performance on at least one or more learning objectives.

Participation

Credit for participation is acquired by showing up and contributing to the weekly team meetings of the final team project.

Grading Breakdown

Assessment	% of Grade
Labs	10
Assignments	10
Weekly Quizzes	10
Final Team Project	30
Written Exam #1	20
Written Exam #2	20
TOTAL	100%

Grading Scale

Grades are not curved but based on proficiency with the material. Ranges operates in favor of the students. At the end of the semester, if the average in the class is lower than 80%, the average will become the cut-off between a B- and a C+. Final scores will be rounded to the nearest whole number (.50 and above rounds up).

$x \geq 93$	A	$73 \leq x < 77$	C
$90 \leq x < 93$	A-	$70 \leq x < 73$	C-
$87 \leq x < 90$	B+	$67 \leq x < 70$	D+
$83 \leq x < 87$	B	$63 \leq x < 67$	D
$80 \leq x < 83$	B-	$60 \leq x < 63$	D-
$77 \leq x < 80$	C+	$x < 60$	F

Assignments Weights

Assignments have different maximum points and weights, contributing to 10% of the total score.

Assignment	Maximum Points	Weight
#1	3	30%
#2	5	30%
#3	6	40%
TOTAL	14	100%

Course Policies

Assignment Submission

Assignments will be discussed in class and worked on individually. Discussion among students is fine, but no copying of other student's code is allowed. The program needs to compile, after being imported in Eclipse export format, and grading will only occur if the program is able to be run. Assignments will be submitted to Brightspace (instructions will be provided in class and on Piazza) and are due by 11:59p.m. on the due date (see Late Policy below). Grading criteria will be provided in a rubric included in the assignment description. TAs, CPs and Graders will grade the assignments. Due to the manual grading, we require you to submit all projects as Eclipse Exported "Archive File" in ZIP format. All grades will be posted to the Brightspace gradebook.

Process Log Policy: all assignments require a process log (10% of score). AI users: submit prompts and fixes. Non-AI users: describe your coding process. Missing logs get 0/10." This is fair and encourages reflection.

Grading Timeline

Assignments will typically be graded within 7 days of the due date. Exams will be auto graded by Brightspace Quiz Tool. Labs will be graded during the lab section in which they are assigned. Final project deliverables will typically be graded within 3 days of the due date during final week. Weekly quizzes will be auto graded by Brightspace Quiz Tool.

Regrading

Once grades are entered into Brightspace gradebook, students will be able to request a regrade if they think a mistake has been made in the grading through the following process:

1. Once an assignment is graded, an online form will be provided on Piazza, to submit a formal regading request. Note that this is the only request that can be made to regrade that specific assignment, so be sure to include all relevant information. Requests will not be able to be submitted after more than 2 days after the form is posted, as the form will be closed.
2. The TAs will review the request and determine if a regrade will be granted.
 - a. If the regrade request is denied, the original grade will stand, and no additional feedback is provided.
 - b. If the regrade request is granted, the TA will forward the request to a grader (possibly a different one than who originally graded it. The grader will conduct a regrade and send the updated score to the TA, who will then enter it, with new feedback, into Brightspace.

3. There will be **only one regrade request per assignment**, using an online form, which may include regrade of multiple items, and the score after the regrade is final. If any questions arise beyond that, the student will need to speak with the professor in person.
4. There is no regrade of the final team project, due on Final Week.

Late Submission

Each student will have **two (2) grace days** to use during the semester for submitting assignments late. Grace days can only be used on *assignments* (**not** labs, final team project deliverables on final week, exams, weekly quizzes, etc.), and the days can be used in any combination. For example, you could use one grace day on assignment 1 and one grace day on assignment 3. All submissions other than for assignments in accordance with this policy must be submitted by 11:59p.m. on the due date or will receive a 0.

After the two grace days have been used, any assignment submitted late will receive a 0. A grace day will be counted for any assignment submitted after 11:59p.m. on the due date. To state that another way, if an assignment is submitted after the due date, at 12:00a.m. (midnight) or later, grace days will be used. The grace days do not need to be approved by the professor, but any exceptions other than grace days will need professor approval. In exceptional circumstances, late submissions will be accepted, with a 30% penalty.

Exams

Exam #1	Thursday, October 22, 2026.	11:00a.m.-12:00p.m.
Exam #2	Tuesday, November 24, 2026.	11:00a.m.-12:00p.m.
Exam #2 (2 nd chance)	Thursday, December 3, 2026.	11:00a.m.-12:00p.m.

The written exams consist of theoretical questions and may include code to be analyzed. No code will be required to be written. All exams are in-person, using the **Brightspace Quiz Tool**, and the **LockDown Browser**. Access to the classroom to take the exams will be provided only after having your student USC ID scanned by smartphone and its ID number verified and checked against a spreadsheet of the roster.

An exam can only be taken on the scheduled date and at the scheduled starting time. Accommodations for students with letters from OSAS will be provided, though the exam will still need to be taken on the scheduled date and start time, unless a specific accommodation has been granted by OSAS, and approved by the instructor. There are no makeup exams. If you miss an exam due to an emergency, official written documentation, whatever that may be based on the situation, will need to be submitted to the instructor as soon as you are physically able (before the exam if possible). Approval of the excuse will be solely based on the instructor discretion though it should be based on a documented illness or emergency. Based on the exam, here are the rules that will be followed:

- If an excuse is not approved, you will be given a 0 on the exam.
- If there is an approved excuse for written exam #1, the percentage for that exam will be added to the percentage for written exam #2.
- If there is an approved excuse for written exam #2, you will receive an Incomplete grade in the course and must make up the exam based on the conditions of an Incomplete.

Attendance

There is no **lecture attendance requirement** that counts towards your grade in the class. However, students who do not attend the lectures are responsible for all material covered in the lectures. Lecture recordings will not be available. In-person attendance is **required for all labs**. The course uses the Piazza online forum platform to efficiently simulate and manage class discussions. Discussions are limited to course materials, assignments, and exams. Following all postings on Piazza is also required.

Final Project

The project in the class will be assigned approximately half-way through the semester. TAs and CPs will create project teams based on random selection. Each team is required to submit a project proposal. As a team you will have weekly meetings with your TA or CP, acting as ad hoc peer mentors and graders. The teams will consist of between 8-9 students. Formal documentation following the software engineering process will be required. The project will be discussed in class with the corresponding due dates. The

project deliverables will be submitted via Brightspace by ZIP files and recorded video and are due by 11:59p.m. on the due date, during final week. The team project has no available grace days.

Labs

The CPs will act as lab assistants for the lab sections each week. There will be an assigned lab program each week that reinforces the topics covered in the lectures. The lab assignments will be graded based on effort, attendance, completion, and understanding. The labs are normally intended to be completed during the lab period, and you are expected to work **individually** on the lab during the section. Completing most of the lab before the lab session is permitted. The lab assistants are there to answer any questions and help you, similarly as they do on Piazza, so use your time in lab wisely. You will be asked one or more questions by the lab assistants at the end of each lab to ensure you understood what was covered. If you cannot answer the questions, the lab assistants can deduct points from your lab grade. 12 labs are worth 0.8% of the final grade, and the AI Lab is worth 0.4% of the final grade and the total lab score is out of 10%.

Weekly Quizzes

There will be weekly quizzes, using Brightspace Quiz Tool, that must be completed each week. This will ensure that students are attending the lectures and understand some of the concepts covered. **The weekly quizzes are worth 10% of the course grade, with 0.77% given each week.** There will be 13 weeks that contain weekly quizzes. All quizzes count.

Academic Integrity

The University of Southern California is foremost a learning community committed to fostering successful scholars and researchers dedicated to the pursuit of knowledge and the transmission of ideas. Academic misconduct is contrary to this fundamental mission and includes any act of dishonesty in the submission of academic work (either in draft or final form), as well as cheating, plagiarism, fabrication (e.g., falsifying data), knowingly assisting others in acts of academic dishonesty, and any act that gains or is intended to gain an unfair academic advantage. Students are expected to uphold the highest standards of academic integrity in all coursework. This course follows the expectations for academic integrity as stated in the [USC Student Handbook](#). All students are expected to submit assignments that are original work and prepared specifically for the course/section in this academic term. Students may not submit work written by others or “recycle” work prepared for other courses without obtaining written permission from the instructor(s). Students suspected of academic misconduct will be reported to the Office of Academic Integrity.

Academic dishonesty has a far-reaching impact and is considered a serious offense against the university. Violations will result in a grade penalty, such as a failing grade on the assignment or in the course, and disciplinary action from the university, such as suspension or expulsion. For more information about academic integrity see the [Student Handbook](#), the [Office of Academic Integrity's website](#), and university policies on [Research and Scholarship Misconduct](#). Please ask your instructor if you are unsure what constitutes unauthorized assistance on an exam or assignment or what information requires citation and/or attribution.

Instructors determine whether and how generative AI tools (such as ChatGPT, Copilot, Claude, Gemini, and similar applications) and other external resources (such as English-language translation tools) may be used in this course. Expectations may vary from assignment to assignment. This includes AI tools that record, transcribe, or summarize class sessions, which may require express instructor permission. Review the AI use guidance provided below carefully and direct any questions to your instructor before submitting work.

Required: Students seeking general guidance may consult the following resources:

- [USC Student Handbook](#)
- [Generative AI General Policy](#)
- [Practical Tips for Using AI in Academic Work](#)
- [Office of Academic Integrity](#)

Permitted Use of Artificial Intelligence (AI) Tools

Generative AI is encouraged: students are expected to use AI (e.g., IDEs like VS Code, AI Assistants like GitHub Copilot and LLMs like GPT-5.5) in this class. The ability to use artificial intelligence (AI) tools effectively and responsibly is an increasingly important professional skill. In this course, you are encouraged to use AI tools to support your learning and coursework.

When using AI tools, keep the following in mind:

- AI may be used to support activities such as brainstorming, exploring ideas, generating examples, revising drafts, summarizing information, coding assistance, or other learning-related tasks, as appropriate.
- You remain responsible for the accuracy, quality, and integrity of all work you submit. AI-generated content may be incomplete, inaccurate, biased, or fabricated and should be reviewed and verified before use.
- AI should be used to support your learning, not replace the intellectual work required to meet the course learning objectives.
- Do not upload personal, confidential, proprietary, or otherwise sensitive information to AI tools unless specifically authorized. Be mindful that information entered into some AI systems may be retained or used in ways outside the university's control.
- Respect copyright, licensing, and intellectual property rights when using AI-generated or AI-assisted content. These materials may not be free of third-party rights or suitable for unrestricted reuse.
- Any use of AI in course assignments does not have to be disclosed and appropriately attributed.
- Additional instructions regarding AI use may be provided for individual assignments or assessments, such as submission of AI logs.

If you have questions about whether a particular use of AI is appropriate, please consult with the instructor before submitting your work

Course Content Distribution and Synchronous Session Recordings Policies

USC has policies that prohibit recording and distribution of any synchronous and asynchronous course content outside of the learning environment.

Recording a university class without the express permission of the instructor and announcement to the class, or unless conducted pursuant to an Office of Student Accessibility Services (OSAS) accommodation. Recording can inhibit free discussion in the future and thus infringe on the academic freedom of other students as well as the instructor. ([Living our Unifying Values: The USC Student Handbook](#), page 13).

Distribution or use of notes, recordings, exams, or other intellectual property, based on university classes or lectures without the express permission of the instructor for purposes other than individual or group study. This includes but is not limited to providing materials for distribution by services publishing course materials. This restriction on unauthorized use also applies to all information, which had been distributed to students or in any way had been displayed for use in relationship to the class, whether obtained in class, via email, on the internet, or via any other media. ([Living our Unifying Values: The USC Student Handbook](#), page 13).

Learning Experience Evaluations

Course evaluation occurs at the end of the semester university wide. It is an important review of students' experience in the class. The intent of the end-of-semester evaluation is to provide an evaluation of the course, the instructor, and whether the learning objectives have been achieved. In addition, the instructor will provide an online [mid-semester evaluation](#) that will be used for early course correction.

Course Schedule

Note: Chapter 31-37 available on Companion Website at www.pearsonhighered.com/liang.

Week	Lecture	Date	Lecture Topic	Chapter	Lab Topic
1	1	August 25, 2026	Introduction, Environment, Methods	1-8	No Lab
	2	August 27, 2026	Classes, Packages, File I/O, Vibe Coding	9-10	
2	3	September 1, 2026	Inheritance, Abstract Classes and Interfaces, Polymorphism	11, 13	Environment Setup
	4	September 3, 2026	Garbage Collection, Exception Handling, Serialization, Generics	12, 19	
3		September 7, 2026	No Labs – Labor Day		Vibe Coding
	5	September 8, 2026	Concurrent Computing	32	
	6	September 10, 2026	Thread Methods, Thread Pools, Thread Priorities	32	
4	7	September 15, 2026	Concurrency, Monitors	32	Inheritance
	8	September 17, 2026	Locks, Conditions	32	
5	9	September 22, 2026	Semaphores, Parallel Computing	32	Threads
	10	September 24, 2026	Producer/Consumer, Multi-Threaded Programming Design		
6	11	September 29, 2026	Software Engineering, Testing, Team Project		Locks and Monitors
	12	October 1, 2026	Network Programming	33	
7	13	October 6, 2026	Multi-Threaded Network Programming	33	Parallel Computing
		October 8-9, 2026	Fall Recess		
8	14	October 13, 2026	Network Theory	33	Software Engineering
	15	October 15, 2026	Network Theory (cont.)	33	
9	16	October 20, 2026	Databases	34	Networking Worksheet
		October 22, 2026, 11:00AM	Exam #1	1-13, 19, 32, 33	
10	17	October 27, 2026	SQL	34	MySQL Installation
	18	October 29, 2026	JDBC	34-35	
11	19	November 3, 2026	HTML, CSS		JDBC
	20	November 5, 2026	HTML/CSS Programming		
12	21	November 10, 2026	Java Servlets	37	Web Server
		November 11, 2026	No Labs, No Classes – Veterans Day		
	22	November 12, 2026	JavaScript		
13	23	November 17, 2026	AJAX		Java Servlets
	24	November 19, 2026	Web Sockets		
14		November 24, 2026, 11:00AM	Exam #2	1-13, 19, 32-35, 37	No Lab
		November 25-29	Thanksgiving Break		
15	25	December 1, 2026	Hacking The Web		JavaScript and AJAX
		December 3, 2026, 11:00AM	Exam #2 – Second Chance	1-13, 19, 32-35, 37	
Final		December 12, 2026	Final Team Project Demonstration (on video) + Deliverables	Refer to the final exam schedule in the USC Schedule of Classes at classes.usc.edu	

Assessments Schedule

NOTE: All labs are worth 0.8% each, except the AI Lab that is worth 0.4%. Quizzes are worth 0.77% each.

Week	Day	Due Date	Assessment	Grade %
1	Sunday	August 30, 2026	Quiz #1	0.7%
2	Monday-Wednesday	August 31, September 2, 2026	Lab #1	0.8%
	Sunday	September 6, 2026	Quiz #2	0.7%
3	Monday	September 7, 2026	No Labs – Labor Day	
	Tuesday-Wednesday	September 8-9, 2026	Lab #2	0.4%
	Sunday	September 13, 2026	Quiz #3	0.7%
4	Monday- Wednesday	September 14-16, 2026	Lab #3	0.8%
	Thursday	September 17, 2026	Assignment #1	3.0%
	Sunday	September 20, 2026	Quiz #4	0.7%
5	Monday-Wednesday	September 21-23, 2026	Lab #4	0.8%
	Sunday	September 27, 2026	Quiz #5	0.7%
6	Monday-Wednesday	September 28-30, 2026	Lab #5	0.8%
	Saturday-Sunday	October 3-4, 2026	FP – Weekly Meeting #1	0.5%
	Saturday-Sunday	October 3-4, 2026	FP – Project Proposal	1.0%
	Sunday	October 4, 2026	Quiz #6	0.7%
7	Monday-Wednesday	October 5-7, 2026	Lab #6	0.8%
	Thursday-Friday	October 8-9, 2026	Fall Recess	
	Sunday	October 11, 2026	Quiz #7	0.7%
8	Monday-Wednesday	October 12-14, 2026	Lab #7	0.8%
	Monday-Sunday	October 12-18, 2026	FP – Weekly Meeting #2	0.5%
	Sunday	October 18, 2026	FP – High-Level Requirements	2.0%
	Sunday	October 18, 2026	Quiz #8	0.7%
9	Monday-Wednesday	October 19-21, 2026	Lab #8	0.8%
	Monday-Sunday	October 19-25, 2026	FP – Weekly Meeting #3	0.5%
	Thursday	October 22, 2026	Exam #1	20%
	Sunday	October 25, 2026	FP – Technical Specifications	2.0%
10	Monday-Wednesday	October 26-28, 2026	Lab #9	0.8%
	Tuesday	October 27, 2026	Assignment #2	3.0%
	Monday-Sunday	October 26-November 1, 2026	FP – Weekly Meeting #4	0.5%
	Sunday	November 1, 2026	FP – Detailed Design	3.0%
	Sunday	November 1, 2026	Quiz #9	0.7%
11	Monday-Wednesday	November 2-4, 2026	Lab #10	0.8%
	Monday-Sunday	November 2-8, 2026	FP – Weekly Meeting #5	0.5%
	Sunday	November 8, 2026	FP – Testing Plan	2.0%
	Sunday	November 8, 2026	FP – Peer Review #1	1.0%
	Sunday	November 8, 2026	Quiz #10	0.7%
12	Monday-Tuesday	November 9-10, 2026	Lab #11	0.8%
	Wednesday	November 11, 2026	No Labs – Veterans Day	
	Monday-Sunday	November 9-15, 2026	FP – Weekly Meeting #6	0.5%
	Sunday	November 15, 2026	FP – Deployment Document	1.0%
	Sunday	November 15, 2026	Quiz #11	0.7%
13	Monday-Wednesday	November 16-18, 2026	Lab #12	0.8%
	Monday-Sunday	November 16-22, 2026	FP – Weekly Meeting #7	0.5%
	Sunday	November 22, 2026	Quiz #12	0.7%
14	Tuesday	November 24, 2026	Assignment #3	4.0%
	Tuesday	November 24, 2026	Exam #2	20%
	Tuesday	November 24, 2026	FP – Peer Review #2	1.0%
	Wednesday-Sunday	November 25 – 29, 2026	Thanksgiving Break	
15	Monday-Wednesday	November 30 - December 2, 2026	Lab #13	0.8%
	Wednesday	December 2, 2026	Quiz #13	0.7%
	Thursday	December 3, 2026	Exam #2 – Second Chance	20%
	Monday-Friday	November 30 - December 4, 2026	FP – Weekly Meeting #8	0.5%
	Friday	December 4, 2026	FP - Complete Documentation	1.0%
	Friday	December 4, 2026	FP – Code Complete	2.0%
Final	Saturday	December 12, 2026	Final Team Project Demonstration + Deliverables	10%

Statement on Academic Conduct and Support Systems

Students and Disability Accommodations

USC welcomes students with disabilities into all of the University's educational programs. [The Office of Student Accessibility Services](#) (OSAS) is responsible for the determination of appropriate accommodations for students who encounter disability-related barriers. Once a student has completed the OSAS process (registration, initial appointment, and submitted documentation) and accommodations are determined to be reasonable and appropriate, a Letter of Accommodation (LOA) will be available to generate for each course. The LOA must be given to each course instructor by the student and followed up with a discussion. This should be done as early in the semester as possible as accommodations are not retroactive. More information can be found at osas.usc.edu. You may contact OSAS at (213) 740-0776 or via email at osasfrontdesk@usc.edu.

Student Financial Aid and Satisfactory Academic Progress

To be eligible for certain kinds of financial aid, students are required to maintain Satisfactory Academic Progress (SAP) toward their degree objectives. Visit the [Financial Aid Office webpage](#) for undergraduate- and graduate-level SAP eligibility requirements and the appeals process.

Support Systems

[Counseling and Mental Health](#) - (213) 740-9355 – 24/7 on call

Free and confidential mental health treatment for students, including short-term psychotherapy, group counseling, stress fitness workshops, and crisis intervention.

[988 Suicide and Crisis Lifeline](#) - 988 for both calls and text messages – 24/7 on call

The 988 Suicide and Crisis Lifeline (formerly known as the National Suicide Prevention Lifeline) provides free and confidential emotional support to people in suicidal crisis or emotional distress 24 hours a day, 7 days a week, across the United States. The Lifeline consists of a national network of over 200 local crisis centers, combining custom local care and resources with national standards and best practices. The new, shorter phone number makes it easier for people to remember and access mental health crisis services (though the previous 1 (800) 273-8255 number will continue to function indefinitely) and represents a continued commitment to those in crisis.

[CARE-SC: Confidential Advocacy, Resources, and Education Support Center](#) - (213) 740-9355(WELL) – 24/7/365 on call.

Confidential advocates, prevention educators, and professional counseling teams work to promote a universal culture of consent, and prevent and respond to gender- and power-based harm. Services available to all USC students at no cost.

[Office of Civil Rights Compliance](#) - (213) 740-5086

Information about how to get help or help someone affected by harassment, discrimination, retaliation on the basis of a protected characteristic, rights of protected classes, reporting options, and additional resources for students, faculty, staff, visitors, and applicants.

[USC Campus Support and Intervention](#) - (213) 740-0411, uscsupport@usc.edu

Assists students and families in resolving complex personal, financial, and academic issues adversely affecting their success as a student.

[USC Emergency Information](#)

Latest updates regarding safety, including ways in which instruction will be continued if an officially declared emergency makes travel to campus infeasible.

[USC Department of Public Safety](#)

For 24 hour emergency assistance or to report a crime: UPC: (213) 740-4321, HSC: (323)-442-1000.

For 24 hour non-emergency assistance or information: UPC: (213) 740-6000, HSC: 323-442-1200.

[Office of the Ombuds](#) - (213) 821-9556 (UPC) / (323-442-0382 (HSC)

A safe and confidential place to share your USC-related issues with a University Ombuds who will work with you to explore options or paths to manage your concern.

[Occupational Therapy Faculty Practice](#) - (323) 442-2850 or otfp@med.usc.edu

Lifestyle Redesign services for USC students to support health promoting habits and routines that enhance quality of life and academic performance.

[The Office of Sustainability](#) promotes numerous ways for all Trojans to study, work, and live sustainably at USC. Students can access tools, resources, and opportunities on their website and in the Sustainability Hub in the Student Union Building, Suite 101.

[USC Report & Response](#) provides a front door to reporting concerns, including an ability to report anonymously, which violate university policies or go against our Unifying Values and helps connect you with the support you need. The website provides a list of confidential resources, supporting offices, and policies that are available to our university community. The [Resources page](#) includes information regarding the university's response in the event of immigration enforcement activity on campus or involving a student or employee. Additional questions may be directed to the Office of Professionalism and Ethics (OPE) and ope@usc.edu or in reviewing the [Office of Professionalism and Ethics](#) website.
